Apollo: the world leader in power, performance, and price

Powerful

The Apollo Portable Laser is the most powerful, lightweight laser on the market. Producing a robust 2,000 milliwatts of pure infrared energy, it allows for treatment times of 1 to 2 minutes. Phenomenal results are achieved quickly making for an efficient use of time and resources while enhancing your bottom line.

Portable

We listened to you and created a truly durable, portable laser weighing less than 2 pounds and equipped with the most advanced state-of-the-art battery technology. The busiest doctor or therapist can carry the Apollo from room to room, treating patients all day on a single charge, without the need for carts or electrical outlets. And, with its stylish carrying case and sleek, ultramodern appearance, Apollo provides a handsome addition to your physical therapy department.

Performance

The Apollo is made of high grade aerospace aluminum, making it lightweight and rugged enough for the most demanding clinical tasks. Apollo's Design Team has an unrivaled dedication to performance, quality and reliability: they have tested and perfected the laser for 7 years internationally in the most demanding clinical environments. This proven reliability allows us to offer a free 3 year, parts and labor warranty – the best in the industry.

Versatile

Want a desktop unit? No problem. We offer our Desktop Module, allowing you to place the Apollo laser and two probes securely on a desk or cart. The Laser and Module gracefully slide into a beautiful, sturdy aluminum travel case when your work requires you to go on the road. This versatility makes the Apollo the best choice for the busy practitioner, clinic, or sports team.

For treating those hard to reach tender, trigger or pain points, Apollo offers a 250 mW point probe, with optional light-guide, in addition to our 2,000 mW laser cluster.

Take a test drive

We've worked long and hard to bring you everything you asked for in the Apollo Portable Laser System, at a price you can afford. To experience the future of laser therapy, call us today for a test drive. Then, fasten your seat belts and feel the thrill and excitement of treating patients with a high performance, portable laser.
